Index of Subjects

- Abstracts**, ECNS and ISNIP joint meeting, September, 2006, 252-284
 —Australasian Society for Psychophysiology, December, 2005, 144-172
- African Americans** and, hypertension and alcohol dependence, P300, 210-214
 —sickle cell disease, stroke in children, EEG hyperventilation, 190-192
- Age factor** and, learning disabled children, neurofeedback, 198-203
 —memory, episodic, 315, 321
 —sleep microarchitecture in childhood and adolescent depression, 1-9
- Aggression** and, frontal alpha power asymmetry in childhood and adolescents, 16-24
- Alcohol** and, EEG modifications, 62
 —ERP sensory processing, 123
 —error-related negativity, 333
 —hypertension, P300, 210-214
 —liver transplantation, 34-40
 —pharmaco-EEG drug-drug interaction, 109, 118, 119
 —QEEG analysis, 83
 —subacute encephalopathy with seizures, SESA, 215-218
 —VEP, 126-127
- Alpha activity** and, Alzheimer disease, 56
 —disruptive behavior and depression in childhood and adolescents, 16-24
 —liver transplantation, 34-40
 —motor EP amplitude, 247-251
 —neurofeedback, 198-203
 —pharmaco-EEG, 61-98, 111-118, 122, 128, 136-139, 142
 —recognition memory, 306
- Alzheimer disease** and, caused by primary deficiency of cerebral blood flow, 175-177
 —CSF drug dosage concentration, 127
 —EEG activation, acetylcholine, 122
 —memory retrieval, 320
 —pharmaco-EEG, cognition-enhancing, 73
 —P300 application, 103, 104
 —QEEG monitoring treatment, 54-59, 77, 92, 93
- Ammon's horn** and, hippocampal sclerosis, epilepsy, memory, 309, 310
- Amnesia** and, experimental findings, 301, 302
 —temporal lobe epilepsy surgery, 309
- Anterior cingulate cortex** and, error-related negativity, 330-335
- Anxiety disorder** and, obsessive compulsive disorder, 141
 —pharmaco-EEG, diagnosis and therapy, LORETA images, 71, 72, 75, 76
 —startle reflex, reactivity to eye opening, 230-234
- Aphasia** and, Alzheimer disease, 176
 —sickle cell disease, 190-192
- Asphyxia** and ictal nystagmus in a newborn baby, 41-45
- Attention**, See ADHD, Cognition, ERP, Memory
- Attention Deficit Hyperactivity Disorder (ADHD)** and, alpha power asymmetry, 17
 —error-related negativity, 330-335
 —neurofeedback, 198, 202
 —pharmaco-EEG, psychostimulants and nootropic drugs, 72
 —seizures, EEG referrals screening, 30, 32
 —sleep microarchitecture, 4
- Autoimmune pathogenesis** and, thyroid encephalopathy, epilepsy partialis continua, 204-209
- Behavior disorder** and, frontal alpha power asymmetry, 16-24
 —neurofeedback, 198-203
 —QEEG evaluation, pharmacological intervention, 135-143
 —See also ADHD, Psychiatric disorders
- Benign childhood epilepsy** and, QEEG and Wechsler Intelligence scale, spikes, 193-197
- Beta activity** and, benign childhood epilepsy, 194-196
 —digital EEG, 183, 184
 —leucoencephalopathy and status epilepticus, 51
 —liver transplantation, 34-40
 —motor EP amplitude, 247-251
 —multiple personality disorder, 235-242
 —pharmaco-EEG, 61-63, 66-98, 110-118, 122, 128, 136-139
 —schizophrenia, 10-15
 —sleep microarchitecture in childhood and adolescent depression, 1-9
- Burst suppression** and, digital EEG, 178-189
- Caffeine** and, drug-drug interactions, 108
 —error-related negativity, 333
 —pharmaco-EEG modifications, 62, 72
- Cannabis** and, QEEG indices, 83
 —VEP visual response, 127
- Central processing time** and, SEP latency, stimulation of the median nerve, 25-29
- Cerebral blood flow** and, Alzheimer disease caused by primary deficiency, 175-177
 —anxiety disorder, 72
 —citalopram, 71
 —liver transplantation, 38
 —sickle cell disease, 191
- Children** and, benign childhood epilepsy, QEEG, intelligence scale, 193-197
 —frontal alpha power asymmetry in behavior disorders, 16-24
 —ictal nystagmus in a newborn, 41-45

- learning-disabled children, neurofeedback and placebo, 198-203
- occipital lobe epilepsy, MRI transient abnormalities, 219-222
- screening EEG referrals, 30-33
- sickle cell disease, EEG hyperventilation and stroke, 190-192
- sleep microarchitecture and depression, 1-9

Cognition and, benign childhood epilepsy, 193-197

- memory, special issue, 285-335
- neurofeedback, learning-disabled children, 198-203
- pharmac-EEG, 66-81, 99-108, 135-143
- See also, Alzheimer disease, EP

Coherence, EEG, and, hemispheric, sleep in childhood and adolescent depression, 1-9

- schizophrenia, 10-15

Complex partial seizures and, digital EEG, 179, 180

- subacute encephalopathy in alcoholics, 215-218
- See also Seizures, Temporal lobe

Contingent negative variation and, visual working memory, 288

Corpus callosum and, interhemispheric EEG coherence, schizophrenia, 10-15

Declarative memory and, novelty detection and encoding within hippocampus, 309-314

Delta activity and, Alzheimer disease, 176

- benign childhood epilepsy, 194-196
- digital EEG, 179-181
- ictal nystagmus in newborn, 41-45
- leucoencephalopathy, nonconvulsive status epilepticus, 50
- occipital lobe epilepsy, 219-222
- pharmac-EEG, 61, 62, 66-98, 111, 113, 115, 118, 122, 128, 136-139
- recognition memory, 306
- sleep microarchitecture in childhood adolescent depression, 1-9

Depression and, bipolar disorder, lithium, 83

- children and adolescents, sleep microarchitecture, 1-9
- hypertension, 210-214
- LDAEP, 100, 102
- pharmac-EEG, antidepressants, 61, 64, 67-71, 74, 81-84, 90-91, 127

Depth recording and, hippocampus, declarative memory, 309-314

Digital EEG and, optimal evaluation, 178-189

Dissociative identity disorder and, EEG variability in 3 women, 235-242

Dose-efficacy relations and, pharmacodynamics of psychotropic drugs, 66-80

Drugs and, antiepileptic medications, 47, 50, 51, 109,

- 125-127, 205, 215, 220
- pharmac-EEG, 60-143
- recreational, 81-83, 101, 123, 124, 127
- See also Alcohol

Electroencephalography (EEG, QEEG) and, Alzheimer disease, cerebral blood flow deficiencies, 175-177

- Alzheimer disease, monitoring treatment, 54-59
- behavior disorders, frontal alpha power asymmetry, 16-24
- benign childhood epilepsy, spikes, intelligence scale, 193-197
- childhood depression, sleep microarchitecture, 1-9
- chorea-acanthocytosis, focal seizures, 46-49
- digital EEG 178-189
- ictal nystagmus in a newborn, 41-45
- leucoencephalopathy, nonconvulsive status epilepticus, 50-53
- liver transplantation, 34-40
- memory, 294, 316, 318, 325
- motor EP, amplitude variance, 247-251
- multiple personality variability, 235-242
- neurofeedback, learning disabled children, 198-203
- occipital lobe seizures, MRI, 219-222
- pharmac-EEG, 60-143
- schizophrenia, interhemispheric coherence, 10-15
- screening referrals, 30-33
- SESA, seizures in alcoholics, 215-218
- sickle cell disease, EEG hyperventilation and stroke, 190-192
- startle reflex to eye opening, psychiatric disorders, 230-234
- thyroid encephalopathy, epilepsy partialis continua, 204-209

Epilepsy, See Seizures

Episodic memory and, electrophysiological measures, control and retrieval, 315-321

Errors, memory and, brain detection, correction, prevention, data and theories, 330-335

Evoked potentials (EP, ERP) and, alcohol dependence, 210-214

- Alzheimer disease, 103, 104
- median nerve, latency differences, 25-29
- memory, special issue, 285-335
- memory trace, number of standard stimuli, 223-229
- motor EP, EEG amplitude variance, 247-251
- multiple sclerosis, 243-246
- pharmac-EEG, 60, 70, 71, 90, 91, 99-107, 121-134, 135-143

Eye movements and, electrophysiology of vision, 121-127

- haloperidol, 69
- ictal nystagmus in a newborn baby, 41-45
- lorazepam, 71
- occipital lobe epilepsy, 219-222
- startle reflex in psychiatric disorders, 230-234
- See also Visual system

Face recognition memory and, insights from brain potentials, 207, 287, 322-329

Familiarity memory and, electrophysiological measures, 292-299, 322-329

- Filter settings** and, digital EEG, 178-189
- Focal seizures** and, SESA syndrome, 215-218
- Frontal lobe** and, Alzheimer disease, 54, 56, 175-177
- behavior disorders, alpha power asymmetry, 16-24
 - interhemispheric EEG coherence in schizophrenics, 10-15
 - leucoencephalitis, nonconvulsive status epilepticus, 52
 - memory, 287, 292-299, 300-304, 316-320, 324, 326, 330-335
 - multiple personality, 235, 238, 239
 - pharmaco-EEG, 69-71, 81-98, 137-141
- Gamma activity** and, digital EEG, 183, 184
- memory encoding, 312
 - motor EP amplitude, 247-251
 - pharmaco-EEG, 64, 99, 105, 121, 124, 125, 136-139
- Gamma aminobutyric acid (GABA)** and, pharmaco-EEG, 63, 71, 91, 111, 121-126, 137, 139
- Gender** and, diazepam, diprohic effect of QEEG, 91
- familiarity memory, 297
 - sleep EEG in childhood and adolescent depression, 1-9
- Generalized tonic-clonic seizures**, See Seizures
- Genetic disorders** and, chorea-acanthocytosis with seizures, 46-49
- Hashimoto's disease** and, epilepsy partialis continua, 204-209
- Head trauma** and, disruptive behavior disorders, 17
- startle reflex to eye opening, 230-234
- Hemiparesis** and, sickle cell disease EEG hyperventilation and stroke, 190-192
- Hepatic encephalopathy** and, QEEG analysis before and after liver transplantation, 34-40
- Hippocampus** and, Alzheimer disease, 175-177
- electrophysiology of memory, 292, 293, 298, 300-307, 309-314
- Homeostatic system** and, QEEG, behavior disorders and pharmacological intervention, 135-143
- Hypertension** and, alcohol dependence P300, 210-214
- Hyperventilation** and, EEG, sickle cell disease and stroke in children, 190-192
- Intelligence** and, benign childhood epilepsy, 153-157
- learning disabled children, neurofeedback, 198-203
 - See also Cognition
- Ischemia** and, Alzheimer disease, cause, 175-177
- sickle cell disease, 190-192
- Key-lock principle** and, pharmaco-EEG, 66, 70, 76
- Leucoencephalopathy** and, nonconvulsive status epilepticus with periodic discharges, 50-53
- Liver transplantation** and, QEEG analysis, 34-40
- Low-resolution electromagnetic tomography (LORE-TA)** and, pharmacodynamics of psychotropic drugs, 66-80, 83, 85, 99-107
- source localization, memory, 331
- Magnetic Resonance Imaging (MRI, fMRI)** and, Alzheimer disease, 175, 176
- chorea-acanthocytosis and seizures, 46-49
 - digital EEG, 178, 186-188
 - hypertension and alcohol dependence, 210
 - ictal nystagmus in a newborn, 41
 - memory, 287, 302, 303, 310, 331-333
 - multiple sclerosis, trigeminal SEP, 243-246
 - occipital lobe epilepsy, 219-222
 - pharmaco-EEG, 64, 99-107, 121, 136, 141
 - schizophrenia, EEG coherence, 11, 13
 - sickle cell disease, stroke, 191
 - thyroid encephalopathy, epilepsy, 204, 205, 208
- Magnetoencephalography (MEG)** and, digital EEG, 178-189
- memory, 300-308, 330
 - pharmaco-EEG, 86, 90, 121, 123, 140
- Median nerve** and, SEP latency, 25-29
- Memory** and, declarative memory, novelty detection and encoding within the hippocampus, 309-314
- episodic memory, electrophysiological measures, control and retrieval, 135-321
 - errors, brain detection, correction, prevention, data and theories, 330-335
 - face recognition, insights from brain potentials, 322-329
 - familiarity, electrophysiological measures, 292-299
 - neurophysiological memory circuit transactions, 139-141
 - obsessive compulsive disorder, 141
 - recognition, electromagnetic correlates, 300-308
 - trace, number of standard stimuli, 223-229
 - visual working memory, ERP measures, 286-291
 - See also Alzheimer disease
- Metabolism** and, pharmaco-EEG, 62, 71-73, 121, 127, 139, 141
- Mismatch negativity** and, memory trace, number of standard stimuli, 223-229
- theories, error-related negativity, 331
- Mood disorders** and, frontal alpha power asymmetry in children and adolescents, 16-24
- See also Obsessive compulsive disorder
- Motor EP** and, amplitude variance and EEG, 247-251
- Multiple personality disorder** and, intra-personal EEG variability in 3 women, 235-242
- Multiple sclerosis** and, trigeminal SEP, 243-246
- Myoclonus** and, Hashimoto's disease, 207
- lithium induced abnormalities, 82
- N1, N2, N13, N20, N30, N60, N140, N250, N400** and, ERP in memory, 302, 304, 309-314, 323-327, 329, 332
- ERP in neuropsychopharmacology, 99-107, 121, 123
 - SEP components in median nerve stimulation 25-29
 - Trigeminal SEP in multiple sclerosis, 243-246
- Narcolepsy** and, key-lock principle in diagnosis, 76
- Neonatal seizures** and, ictal nystagmus, 41-45
- Neurofeedback** and, disruptive behavior disorders, 22
- learning-disabled children, follow-up study, 198-203
- Neuropharmacology**, See Pharmaco-EEG

- Neurotransmitters** and, neuropharmacology, electrophysiology, 121-143, 333
 —See also Memory, Pharmacology-EEG
- Nonconvulsive status epilepticus** and, necrotizing leucoencephalopathy, 50-53
- Novelty detection** and, declarative memory, 309-314
- Nystagmus** and, ictal episodes in a newborn baby, 41-45
- Obsessive compulsive disorder** and, homeostatic system, pathophysiology, 141, 142
 —memory, error-related negativity, 330, 333
- Occipital lobe** and, pharmacology-EEG localization, 68-71, 86
 —ictal nystagmus in newborn, 41-45
 —memory, 287, 289, 295, 302, 306, 326
 —multiple personality, 238
 —transient MRI abnormalities in epilepsy, 219-222
- Old/new effect** and, familiarity memory, 292-299
- Oscillations** and, gamma band frequencies, 105, 124, 125
 —pharmacology-EEG, evaluation of behavior disorders, 136, 137
 —recognition memory, 300-308
- P1, P2, P13, P14, P40, P100, P600** and, face recognition, 323, 324
 —neuropsychopharmacology, 99-107, 121, 123, 139
 —SEP stimulation median nerve, 25-29
 —trigeminal SEP in multiple sclerosis, 243-246
 —See also P300
- Panic disorder** and, pharmacology-EEG, 72
 —startle reflex reactivity to eye opening, 230-234
- Parietal lobe** and, benign childhood epilepsy, 193-147
 —ictal nystagmus, 41
 —memory, 287, 289, 293, 294, 300-302, 306, 318, 320, 323-327, 331, 332
- Parkinson's disease** and, pharmacology-EEG, 123, 124, 127, 129
- Periodic short-interval diffuse discharges** and, leucoencephalopathy with nonconvulsive status epilepticus, 50-53
- Pharmacology-EEG, special issue**, and, drug-drug interaction, 108-120
 —ERP and fMRI in neuropsychopharmacology, 99-107
 —history and progress, crossroads, 60-65
 —LORETA, pharmacodynamics of psychotropic drugs, 66-80
 —neuroscience to neuropharmacology, progress in electrophysiology 121-134
 —psychiatry, 81-98
 —QEEG relevance, evaluation of behavior disorders, pharmacological intervention, 135-143
- Posttraumatic stress disorder** and, startle reflex reactivity to eye opening, 230-234
- Priming** and, face recognition, 322-329
- Prosopagnosia** and, face perception, brain potentials, 287, 322-329
- Psychiatric disorders** and, frontal alpha power asymmetry, 16-24
 —frontal connectivity between hemispheres in schizophrenia, 10-15
 —memory, 330, 333
 —pharmacology-EEG, 63, 66-108, 117, 118, 126, 127, 135-143
 —sleep microarchitecture in childhood and adolescent depression, 1-9
 —startle reflex reactivity to eye opening, 230-234
- P300 ERP** and, Alzheimer disease, 103, 104
 —coma, 139
 —hypertension and alcohol dependence, 210-214
 —memory, 304
 —pharmacological effects, 60, 70, 71, 99
 —schizophrenia, 104
- Reaction time** and, electromagnetic correlates of recognition memory processes, 300-308
- Recognition memory** and, electrophysiological measures, 292-299
 —electromagnetic correlates, 300-308
 —face recognition, 322-329
 —QEEG in Alzheimer's disease, 54-59
- Referral scrutinization** and, screening of EEG referrals by neurologists, 30-33
- REM sleep** and, childhood and adolescent depression, 1-9
- Reticular activating system** and, EEG oscillations, 136
 —homeostatic EEG regulatory system, 138-141
 —transsynaptic activity, 122
- Retrieval** and, episodic memory, 315-321
- Schizophrenia** and, functional connectivity between hemispheres, 10-15
 —memory, error-related negativity, 330, 333
 —pharmacology-EEG, 68-70, 75, 77, 82-90, 104, 127
 —startle reflex reactivity to eye opening, 230-234
- Seizures** and, chorea-acanthocytosis, 46-49
 —digital EEG, 178-189
 —ictal nystagmus in a newborn, 41-45
 —leucoencephalopathy, 50-53
 —occipital lobe epilepsy, 219-222
 —pharmacology-EEG, 63, 82, 93, 127
 —QEEG, benign childhood epilepsy, 193-197
 —screening EEG referrals, 30-33
 —sickle cell disease, hyperventilation, stroke, 190-192
 —subacute encephalopathy in alcoholics, 215-218
 —temporal lobe, memory, hippocampus, 319-314
 —thyroid encephalopathy, 204-209
- Semantic memory** and, brain potentials, 322-329
 —declarative memory, 309-314
- Serotonergic system** and, disruptive behavior disorders, 22, 23
 —pharmacology-EEG, 70, 90, 99-107, 114, 126, 141
- Sickle cell disease** and, EEG hyperventilation and stroke in children, 190-192
- Sleep** and, EEG oscillations, 136
 —microarchitecture in childhood and adolescent depression, 1-9

- pharmaco-EEG history, 61
- reticular activating system, 136, 137
- Special issues**, pharmaco-EEG at a Crossroads, 60-143
 - exploring human memory processes and event-related potentials, section 1, 285-335
- SPECT** and, liver transplantation, 34-40
- Spikes** and, benign childhood epilepsy, 193-197
 - chorea-acanthocytosis, seizures, 46-49
 - digital EEG, 178-189
 - ictal nystagmus in a newborn, 41-45
 - leukoencephalopathy, nonconvulsive, status epilepticus, 50-53
 - pharmaco-EEG, 63, 81-82
 - screenings of EEG referrals, 30-33
 - sickle cell disease, hyperventilation, stroke, 190-192
 - subacute encephalopathy, seizures in alcoholics, 215-218
 - temporal lobe, ERP contamination, 310
 - thyroid encephalopathy, epilepsy, 204-209
- Startle reflex** and, eye opening in psychiatric disorders, 230-234
- Status epilepticus** and autoimmune thyroid encephalopathy, 204-209
 - necrotizing leucoencephalopathy, nonconvulsive, 50-53
- Stroke** and, EEG hyperventilation in children with sickle disease, 190-192
 - hypertension and alcohol dependence in African Americans, P300, 210-214
- Structural lesions** and, digital EEG, 178-189
 - memory, 300, 301, 306-314
 - necrotizing leucoencephalopathy with nonconvulsive status epilepticus, 50-53
- Subacute encephalopathy with seizures in alcoholics (SESA)** and, unusual case, 215-218
- Subdural grid recordings** and, digital EEG, 178-189
- Surgery** and, temporal lobe epilepsy, declarative memory, 309-314
 - uncontrolled epilepsy, digital EEG, 189
- Temporal lobe** and, chorea-acanthocytosis with seizures, 46-49
 - ecstasy, current source density, 83
 - memory, 287, 292, 293, 298, 300-302, 306-314, 319, 324
 - multiple personality, 235, 238, 239
 - schizophrenia, 70
 - seizures, memory, hippocampus, 319-314
 - subacute encephalopathy with seizures in alcoholics, 215-218
- Theta activity** and, Alzheimer disease, 56
 - benign childhood epilepsy, 194-196
 - ictal nystagmus in newborn, 41-45
 - liver transplantation, 34-40
 - neurofeedback in learning-disabled children, 198-203
 - pharmaco-EEG, 61, 62, 66-98, 111, 113, 115, 118, 122, 128, 136-139, 142
 - recognition memory, 300-308
 - SESA, 215
 - sickle cell disease, EEG hyperventilation, 190-192
 - thyroid encephalopathy, 206-207
- Thyroid encephalopathy** and, epilepsy partialis continua, 204-209
- Time course** and, memory, recognition, 293, 324, 326, 327
 - pharmaco-EEG, 73, 75
- Tomography**, See LORETA
- Transcranial magnetic stimulation** and, motor EP, 247-251
- Trigeminal SEP** and, multiple sclerosis, 243-246
- Ultradian rhythms** and, sleep in childhood and adolescent depression, 1-9
- Ultralow EEG activity** and, digital EEG, 178-189
- Vascular disorders** and, Alzheimer disease, caused by deficiency of cerebral blood flow, 175-177
 - hypertension and alcohol dependence, P300, 210-214
 - sickle cell disease 190-192
 - See Cerebral blood flow
- Visual system** and, electrophysiology of vision, 123-127
 - multiple sclerosis, VEP, 243-246
 - nystagmus ictal episodes in a newborn baby, 41-45
 - occipital lobe epilepsy, VEP, MRI, 219-222
 - startle reflex with eye opening in psychiatric disorders, 230-234
 - working memory, ERP, 286-291
- Visual working memory** and, ERP measures, 286-291
